PRE-PRIMARY | SEPTEMBER-2026

Building Mathematical Foundations

Through activities such as **Counting Beads and Numerical Rods & Cards,** our Kindergarten students develop **early numeracy skills, number sense, sequencing, and an understanding of quantity.** These hands-on activities also support concentration, fine motor skills, logical thinking, and problem-solving, laying a strong foundation for future mathematical learning.

Creative Learning Through Art

Through **Egg Shell Activity** and **Cotton Art,** Kindergarten students engage in hands-on creative learning. Colouring and decorating egg shells helps develop **fine motor skills, hand-eye coordination, concentration, and careful handling,** while Cotton Art encourages **sensory exploration, creativity, and controlled hand movements.**

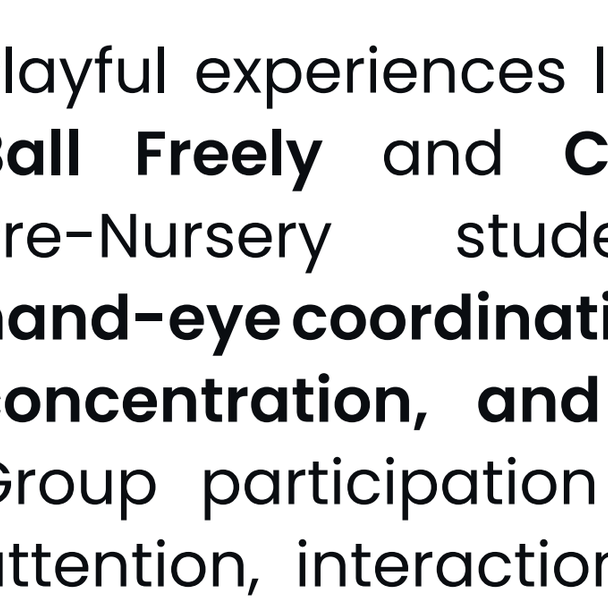

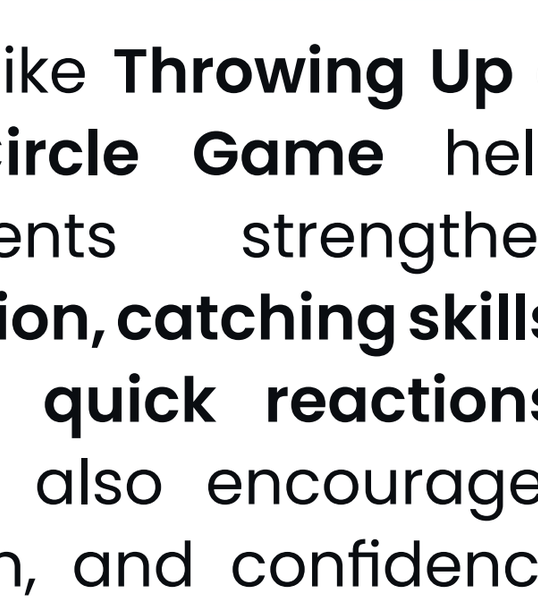

Nurturing Faith & Character in Pre-Primary!

Under the weekly Tarbiyah theme, this month, our little learners explored **positive thinking, managing anger,** the inspiring **Seerat-e-Ghaus Pak,** and **Sunnah etiquettes of eating.** We invite parents to encourage these beautiful daily Tarbiyah habits at home so our children continue living their Islamic values!

Building Physical and Social Skills

Playful experiences like **Throwing Up a Ball Freely** and **Circle Game** help Pre-Nursery students strengthen **hand-eye coordination, catching skills, concentration, and quick reactions.** Group participation also encourages attention, interaction, and confidence while developing essential motor skills.

Building Early Language Skills

CVC word activities help students strengthen **phonics, letter-sound recognition, blending, and early reading skills.** Engaging practice builds their vocabulary and confidence, creating a strong foundation for **English language development and independent reading**.
